

THE TULI WAY

- Data done right

SUBJECT: Mating list

This is a good time of the year to record your mating list.

As most breeders now know the exact dates bulls went in and out in their mating season.

What to do:

- ✓ Record your mating list on Logix.
- ✓ Record the exact dates bulls went in with each group of cows and the exact dates they were removed.
- ✓ Match the sire or multiple sires with the cows they mated.

Why do we record a mating list:

- ✓ It helps to enhance the accuracy of fertility in the herd and breed.
- ✓ By this data we can identify what female animals tend to calve earlier in every calving season meaning what females normally get pregnant first.
- ✓ And what females does not calve.
